

Scanning

Looking to get a digital copy of some old photos or documents?

We can scan anything up to 36 inches wide by up to 50 feet long. If you like, we can email your scan to you or burn it to a disk. Our scanners allow 300 dpi or higher resolution. Photos or prints can be clarified by foreground/background removal and the many features available on our scanners. Slides can be scanned, then edited to adjust the color and clarity.
